👤 PROFESSIONAL SUMMARY

React Native Engineer with 4+ years of experience building and shipping production-grade cross-platform mobile applications using React Native, TypeScript, Redux, and Firebase. Led development of multi-app business suites supporting real-time logistics, POS integration, and operational workflows. Strong focus on performance optimization, scalable architecture, and reliable CI/CD pipelines using Expo EAS and GitHub Actions.

👛 EXPERIENCE

Mobile Engineer (React Native)

PINEAPP SOLUTIONS

09/2025 – Present | Remote

- Led development and Play Store deployment of 4 cross-platform mobile applications, supporting approximately 800–2,000+ total downloads across logistics and POS use cases.
- Owned full mobile lifecycle from architecture design to production deployment, reducing average feature release cycle from 3 weeks to 1.5–2 weeks through improved state management and CI/CD automation.
- Designed modular feature-based architecture using Redux and Context API, reducing integration-related bugs by an estimated 20–30%.
- Implemented real-time order tracking and push notifications using Firebase Cloud Messaging, improving order update reliability and reducing missed order incidents by approximately 25%.
- Improved app startup time by approximately 30% by optimizing API calls, lazy-loading heavy modules, and reducing unnecessary re-renders.
- Reduced crash frequency by an estimated 20–40% by fixing async state race conditions and implementing proper error boundaries.
- Collaborated closely with product and backend teams to define API contracts and improve feature delivery alignment.

Mid-Level Mobile Developer

TECHROOM

01/2025 – Present | Uyo, Akwa Ibom

- Built a full authentication and listing flow serving 1,000+ property searches monthly.
- Implemented a Redux-powered filtering system, reducing property search time by approximately 40%.
- Integrated Firebase real-time updates to sync new listings instantly across active users.
- Optimized large property lists using memoization and virtualization, improving scroll performance and reducing frame drops.

Junior React Native Developer

ROOTHUB

08/2021 – 12/2022 | Uyo, Akwa Ibom

- Implemented core UI components and REST API integrations for cross-platform apps serving hundreds of users.
- Reduced screen load times by approximately 20% by optimizing API batching and minimizing unnecessary re-renders.

Java & JavaScript Tutor

JAMVITA

02/2019 – 11/2021 | Ajegunle, Lagos

- Mentored 20+ students in programming fundamentals and debugging techniques.

Desktop Publishing Instructor

DECO WHIZZAT

05/2017 – 07/2019 | Lagos, Nigeria

- Delivered hands-on technical training and maintained computer systems.

PROJECTS

PBG Business Suite — Pineapp Solutions

Developed and delivered a comprehensive suite of 5 cross-platform mobile applications for PBG Logistics, including PBG Logistics, PBG Driver, PBG Sales (POS-enabled), PBG Kitchen, and PBG Customer, leveraging React Native, TypeScript, Redux, and Firebase to streamline operations, enhance user experience, and support real-time business processes.

09/2025 – Present

- Architected and delivered 5 interconnected mobile applications (PBG Logistics, PBG Driver, PBG Sales – POS-enabled, PBG Kitchen, and PBG Customer) supporting end-to-end logistics and order workflows.
- Enabled real-time inventory and order synchronization using Firebase, supporting daily transaction volumes of approximately 200–800+ orders.
- Integrated POS hardware (Nomba terminals) to streamline in-store transactions and reduce manual processing errors.
- Improved operational workflow efficiency by an estimated 30% by digitizing order management and tracking.
- Implemented secure authentication flows with token-based access control and protected route guards.
- Maintained CI/CD pipeline using Expo EAS and GitHub Actions, enabling consistent OTA updates and reducing deployment friction.
