PROFILE

React Native engineer with 6 years of professional experience shipping cross-platform Android and iOS apps in TypeScript, with 10 apps live in the stores: 8 on Google Play and 2 on the Apple App Store. I've built for users in Nigeria and the United States across logistics, POS, e-commerce marketplaces, real estate and government. Most recently I architected a five-app logistics and POS suite handling 200–800+ orders a day, with real-time Firebase sync, POS terminal integration and EAS-based CI/CD with over-the-air updates. I own the full mobile lifecycle: architecture, API contracts with backend teams, performance tuning and store releases.

6 yrs
building and shipping React Native apps

10 apps
live in the stores: 8 on Google Play, 2 on the App Store

800+
orders a day synced in real time at peak

~25%
fewer missed orders after push-notification rollout

PUBLISHED APPS

Pineapp Solutions · grohh suite
- ▸ grohh MyMarket
- ▸ grohh Sales (POS)
- ▸ grohh Storerunner
- ▸ grohh Driver
- ▸ grohh Logistics

5 × Google Play

Anora.Dev · Qartt marketplace
- ▸ Qartt (buyer)
- ▸ Qartt Business (vendor)

2 × Google Play · 2 × App Store (US)

Abia State Government
- ▸ PS Attendance

1 × Google Play

TECHNICAL SKILLS

Mobile	React Native, Expo SDK, Expo Router, React Navigation, cross-platform Android & iOS, POS hardware integration (Nomba)
Languages	TypeScript, JavaScript (ES6+)
State & data	Redux Toolkit, React Query (TanStack Query), Context API, REST APIs, Axios, offline-capable data flows
Backend services	Firebase (real-time sync, Cloud Messaging push notifications), Supabase
Performance	List virtualization, memoization, lazy loading, render and network optimization
Delivery	Expo EAS Build / Submit / Update (OTA), GitHub Actions CI/CD, Google Play Console, App Store Connect, versioning & release notes, Git (feature branches, PR reviews)
Testing & APIs	Jest, Postman, Swagger / OpenAPI

EXPERIENCE

Mobile Engineer (React Native) · Abia State Government House — 04/2026 – Present · Abia, Nigeria

Mobile apps for the state government's internal digital systems and public-sector operations.

- Built and published **PS Attendance** on Google Play, letting authorised public service employees check in each morning and sign out each evening, with daily attendance records.
- Added location verification so attendance can only be logged from an authorised workplace, with access restricted to verified staff.
- Turn stakeholder requirements into shippable mobile features, working with technical teams to improve usability and system efficiency.
- Own feature implementation, deployment and ongoing maintenance across the government's mobile solutions.

React Native Developer (Contract) · Anora.Dev — 09/2025 – 09/2026 · Remote

Qartt, a US marketplace for buying products from Africa: the Qartt buyer app for US shoppers and Qartt Business for vendors in Nigeria. Both apps are live on Google Play and the App Store.

- Built and maintained features for both apps with React Native, Expo, TypeScript and Expo Router.

- **Qartt Buyer (US):** worked on shopping and ordering flows, user authentication and navigation, improving the end-to-end buyer experience.
- **Qartt Business (Nigeria):** built vendor workflows and order-management features, refined the interface and fixed bugs.
- Integrated APIs and handled app state and authentication flows across both apps.
- Ran releases end to end: version updates, user-facing release notes and iOS App Store build submissions.
- Shipped through a Git and GitHub workflow with feature branches and pull-request reviews.

Stack: React Native, TypeScript, Expo, Expo Router, REST APIs, App Store Connect, Git/GitHub

Mobile Engineer (React Native) · Pineapp Solutions

09/2024 – 04/2026 · Remote

Led mobile for the grohh business suite (PBG), a platform connecting MSMEs, logistics and customers: MyMarket (customer), Sales (POS), Storerunner (kitchen), Driver and Logistics.

- Architected and delivered five interconnected Android and iOS apps, all five live on Google Play under the grohh brand.
- Built real-time order and inventory sync on Firebase, supporting 200–800+ orders per day across kitchen, sales, driver and customer apps.
- Rolled out Firebase Cloud Messaging for live order tracking and alerts, cutting missed-order incidents by ~25%.
- Integrated Nomba POS terminals into the Sales app, streamlining in-store payments and reducing manual processing errors.
- Designed a modular, feature-based architecture with Redux Toolkit for client state and React Query for server state, reducing integration bugs.
- Implemented token-based authentication with protected route guards across the suite.
- Set up CI/CD with GitHub Actions and Expo EAS, shipping OTA updates without waiting on store review.
- Defined API contracts with backend engineers and improved app startup through lazy loading and request and render optimization.

Stack: React Native, TypeScript, Expo, Redux Toolkit, React Query, Firebase, FCM, REST, EAS, GitHub Actions

Mobile Engineer (React Native) · Techroom

01/2023 – Present · Uyo, Akwa Ibom

Real-estate app for searching, listing and managing properties.

- Built the authentication and property-listing flows behind 1,000+ property searches a month.
- Built a Redux-powered filtering system that cut property search time by ~40%.
- Moved server state to React Query, removing redundant API calls and making screens noticeably more responsive.
- Added Firebase real-time updates so new listings appear instantly for every active user.
- Eliminated scroll jank on large listing feeds with list virtualization and memoization.

Stack: React Native, TypeScript, Redux Toolkit, React Query, Firebase

Junior React Native Developer · Roothub

08/2020 – 12/2022 · Uyo, Akwa Ibom

- Built core UI components and REST API integrations for Android and iOS apps serving hundreds of users.
- Cut screen load times by ~20% by batching API calls and removing unnecessary re-renders.

Programming Tutor · Jamvita

2019

- Taught JavaScript and React Native fundamentals to students, which laid the foundation for my move into professional mobile development.

OPEN-SOURCE PROJECT

Placewise · github.com/Savic3916/PLACEWISE

- React Native real-estate app for buying, selling and renting homes, with property browsing, quick listing creation and direct chat between buyers and sellers.

EDUCATION

B.Sc. Computer Science

2017 – 2023

University of Uyo, Akwa Ibom

WAYS OF WORKING

Remote-first, async-friendly. Comfortable working closely with product, design and backend teams from spec to release.
