🎓 EDUCATION

B.Sc. Computer Science

University of Uyo

12/2017 – 07/2023 | Uyo, Nigeria

🧩 CORE EXPERTISE

- React Native Architecture
- Performance Optimization
- CI/CD & Mobile Deployment
- Firebase & Realtime Systems
- POS Integration
- State Management (Redux, Context API)
- Cross-Platform Development
- REST API Integration
- OTA Updates (Expo EAS)

📋 PROFESSIONAL SUMMARY

React Native Engineer with 4+ years of experience building production-grade cross-platform applications across logistics, POS, and operational systems. Experienced in leading mobile architecture, shipping multi-app ecosystems, optimizing application performance, and managing CI/CD pipelines using Expo EAS and GitHub Actions. Proven ability to deliver scalable mobile solutions supporting real-time operations and business-critical workflows.

👛 EXPERIENCE

Mobile Engineer (React Native)

PINEAPP SOLUTIONS

09/2025 – 04/2026 | Remote

- Led development and Play Store deployment of 4 cross-platform mobile applications, supporting thousands of production users across logistics and POS workflows.
- Owned full mobile lifecycle from architecture design to production deployment, reducing average feature release cycle from 3 weeks to 1.5–2 weeks through improved state management and CI/CD automation.
- Designed modular feature-based architecture using Redux and Context API, and reduced integration-related bugs through modular architecture.
- Implemented real-time order tracking and push notifications using Firebase Cloud Messaging, improving order update reliability and reducing missed order incidents by approximately 25%.
- Improved application startup performance through lazy loading, API optimization, and render optimization techniques.
- Collaborated closely with product and backend teams to define API contracts and improve feature delivery alignment.

Mobile Engineer (React Native)

Abia State Government House

05/2026 – Present | Abia, Nigeria

- Contributed to internal digital systems and operational workflows supporting public-sector processes.
- Collaborated with stakeholders and technical teams to improve mobile usability and system efficiency.
- Participated in deployment, maintenance, and feature implementation across mobile solutions.
- Assisted in implementing scalable mobile features and workflow improvements across internal operational systems.

CORE TECHNOLOGIES

React Native, TypeScript, JavaScript ● ● ● ● ●

Redux, Context API, React Query ● ● ● ● ●

Jest ● ● ● ● ●

Firebase (Auth, Firestore, FCM) ● ● ● ● ●

Supabase ● ● ● ● ●

Expo & EAS Build ● ● ● ● ●

Github Actions ● ● ● ● ●

Git, Github ● ● ● ● ●

Postman, Swagger ● ● ● ● ●

Mobile Engineer (React Native)

TECHROOM

01/2025 – Present | Uyo, Akwa Ibom

- Built a full authentication and listing flow serving 1,000+ property searches monthly.
- Implemented a Redux-powered filtering system, reducing property search time by approximately 40%.
- Integrated Firebase real-time updates to sync new listings instantly across active users.
- Optimized large property lists using memoization and virtualization, improving scroll performance and reducing frame drops.

Junior React Native Developer

ROOTHUB

08/2021 – 12/2022 | Uyo, Akwa Ibom

- Implemented core UI components and REST API integrations for cross-platform apps serving hundreds of users.
- Reduced screen load times by approximately 20% by optimizing API batching and minimizing unnecessary re-renders.

SELECTED ENGINEERING PROJECTS

PBG Business Suite — Pineapp Solutions

Developed and delivered a comprehensive suite of 5 cross-platform mobile applications for PBG Logistics, including PBG Logistics, PBG Driver, PBG Sales (POS-enabled), PBG Kitchen, and PBG Customer, leveraging React Native, TypeScript, Redux, and Firebase to streamline operations, enhance user experience, and support real-time business processes.

09/2025 – Present

- Architected and delivered 5 interconnected mobile applications (PBG Logistics, PBG Driver, PBG Sales – POS-enabled, PBG Kitchen, and PBG Customer) supporting end-to-end logistics and order workflows.
- Enabled real-time inventory and order synchronization using Firebase, supporting daily transaction volumes of approximately 200–800+ orders.
- Integrated POS hardware (Nomba terminals) to streamline in-store transactions and reduce manual processing errors.
- Improved operational workflow efficiency by digitizing order management and real-time tracking processes.
- Implemented secure authentication flows with token-based access control and protected route guards.
- Maintained CI/CD pipeline using Expo EAS and GitHub Actions, enabling consistent OTA updates and reducing deployment friction.
