🎓 EDUCATION

B.Sc. Computer Science

University of Uyo

12/2017 – 07/2023 | Uyo, Nigeria

🧩 CORE EXPERTISE

- React Native Architecture
- TypeScript
- Expo Router & React Navigation
- Expo & EAS
- RESTful API Integration
- React Query
- Redux Toolkit & Context API
- Firebase & Real-time Systems
- Performance Optimization
- Cross-Platform Android & iOS
- CI/CD (GitHub Actions + Expo EAS)

👤 PROFESSIONAL SUMMARY

React Native Engineer specializing in TypeScript with 5+ years of experience building and shipping production-grade Android and iOS applications across logistics, POS, real-time operations, and enterprise workflow systems.

Experienced in designing scalable mobile architectures, integrating RESTful APIs, implementing real-time systems with Firebase, optimizing application performance, and delivering CI/CD pipelines using Expo EAS and GitHub Actions. Passionate about building maintainable, high-performance mobile applications that solve real business problems.

👛 EXPERIENCE

Mobile Engineer (React Native)

PINEAPP SOLUTIONS

09/2025 – 04/2026 | Remote

- Led development and Play Store deployment of 4 production Android and iOS applications, supporting thousands of users across logistics and POS workflows.
- Owned the full mobile lifecycle from architecture design to production deployment, integrating RESTful APIs across multiple production applications while collaborating closely with backend engineers to design scalable API contracts.
- Designed modular feature-based architecture using Redux Toolkit, React Query, and Context API, reducing integration-related bugs and improving server-state management.
- Implemented real-time order tracking and push notifications using Firebase Cloud Messaging, improving order update reliability and reducing missed order incidents by approximately 25%.
- Improved application startup performance through lazy loading, API optimization, and render optimization techniques.
- Collaborated closely with product and backend teams to define API contracts and improve feature delivery alignment.

Mobile Engineer (React Native)

Abia State Government House

05/2026 – Present | Abia, Nigeria

- Contributed to internal digital systems and operational workflows supporting public-sector processes.
- Collaborated with stakeholders and technical teams to improve mobile usability and system efficiency.
- Participated in deployment, maintenance, and feature implementation across mobile solutions.

CORE TECHNOLOGIES

React Native, TypeScript, JavaScript ● ● ● ● ●

Expo, Expo Router, Expo EAS ● ● ● ● ●

Redux Toolkit, Context API, React Query ● ● ● ● ●

Firebase ● ● ● ● ●

Supabase ● ● ● ● ●

RESTful APIs, Axios

Git, GitHub ● ● ● ● ●

GitHub Actions ● ● ● ● ●

Jest ● ● ● ● ●

Postman, Swagger ● ● ● ● ●

- Assisted in implementing scalable mobile features and workflow improvements across internal operational systems.

Mobile Engineer (React Native)

TECHROOM

01/2025 – Present | Uyo, Akwa Ibom

- Built a full authentication and listing flow serving 1,000+ property searches monthly.
- Implemented React Query for efficient server-state management, reducing unnecessary API requests and improving application responsiveness.
- Implemented a Redux-powered filtering system, reducing property search time by approximately 40%.
- Integrated Firebase real-time updates to sync new listings instantly across active users.
- Optimized large property lists using memoization and virtualization, improving scroll performance and reducing frame drops.

Junior React Native Developer

ROOTHUB

08/2021 – 12/2022 | Uyo, Akwa Ibom

- Implemented core UI components and RESTful API integrations for Android and iOS applications serving hundreds of users.
- Reduced screen load times by approximately 20% by optimizing API batching and minimizing unnecessary re-renders.

SELECTED ENGINEERING PROJECTS

PBG Business Suite — Pineapp Solutions

Designed and delivered a production-grade ecosystem of five interconnected Android and iOS applications supporting logistics, POS transactions, customer ordering, and real-time operational workflows using React Native, TypeScript, Redux Toolkit, Firebase, Expo, and RESTful APIs.

09/2025 – 06/2026

- Architected and delivered 5 interconnected mobile applications (PBG Logistics, PBG Driver, PBG Sales – POS-enabled, PBG Kitchen, and PBG Customer) supporting end-to-end logistics and order workflows.
- Enabled real-time inventory and order synchronization using Firebase, supporting daily transaction volumes of approximately 200–800+ orders.
- Integrated POS hardware (Nomba terminals) to streamline in-store transactions and reduce manual processing errors.
- Implemented secure authentication flows with token-based access control and protected route guards.
- Maintained CI/CD pipeline using Expo EAS and GitHub Actions, enabling consistent OTA updates and reducing deployment friction.
